

FASHION / LIFESTYLE

We offer customized solutions for your high-quality products.

The fashion industry is a fast moving industry. Delivery times, precision, availability and reliability are significant factors of success.

Since production is increasingly being outsourced to low-cost countries, the supply chains are more complex and diverse.

Constantly changing trends and fast collection changes make fashion logistics one of the most demanding logistics sectors. Flexible and individual solutions are in demand here. We establish perfect processes for your flows of goods and give you more room for your core tasks.

Our employees make possible what often appears to be impossible. Multinational acquisitions are not a problem for us, because we are at home in many markets. We also know what is better to take care of in the production country in order to save costs. Together with you, we analyze the entire process and show you where efficiency can be increased.

We also have years of experience in the area of luxury textiles. Security plays an important role in the area of luxury goods. The sales chain must be secured at all times. Our platforms fulfill the corresponding regulations and are equipped with the necessary equipment that guarantees secure contact with the products. Video monitoring, protective baskets, access controls for operators and drivers are standard by us and the be-all and end-all in this special transport segment.

Our offer in the fashion / lifestyle solutions area:

- Purchase order follow-up and document monitoring
- Prior merchandise manipulations, quality control, storage, commissioning, labeling, pricing, barcode
- Consolidation of the deliveries in the acquisition markets and subsequent transport
- Worldwide transport by street, air and sea
- IT, internet and EDI-supported connection to existing systems

Did we catch your interest?

We are gladly available for any further questions and look forward to hearing from you.
